-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States,

(c) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 12 and 19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Marcus et al.

Claims 12-14,21 and 22 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Nordtvedt.

Claims 12,16,18 and 20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by GB pat. '168 to Facey.

Claims 16-18 and 20 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Nir.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Moreno '934 in view of Nordtvedt. Moreno shows the claimed device with the exception of the transverse rings with an opening. Nordtvedt shows a tube with transverse rings 11 with an opening. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Moreno for his tube to comprise transverse rings, as taught by Nordtvedt, to facilitate folding of his tube.

Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over GB pat. '168 to Facey in view of Nordtvedt. Facey shows the claimed device with the exception of the transverse rings with a tension member. Nordtvedt shows a tube with transverse rings 11 with a tension member 12. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Facey for his tube to comprise transverse rings and tension member, as taught by Nordtvedt, to facilitate folding and tensioning of his tube.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Goble in view of Horsky. Goble shows the claimed device with the exception of the air cushions. Horsky shows air cushions as a braking means. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide Moreno with air cushions, as taught by Horsky, for braking the speed of descent of a user.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin C. Chin-Shue whose telephone number is 571-272-6828. The examiner can normally be reached on Monday-Friday, 8:00 a.m. - 4:30 p.m..
